Kavoseismic/Andrzej Dusak
ul. Przy Skarpie 10F / 10
87-100 Toruń

REFERENCES

San Leon Services Sp. z o.o. is a European focused exploration and production Company. We have hired Kavoseismic in June, July and August 2013 in order to audit Seismic Crew during Praszka 2D project with a wide range of seismic acquisition-related services, ranging from seismic survey design, through acquisition, HSE and QC. As well as the advisory and supervision of experimental work carried out by NovaSeis.

We can highly recommend Kavoseismic as a reliable and professional partner providing high quality services for seismic survey. Kavoseismic offers not only a top level geophysics consultancy, but also a deep understanding of Oil & Gas needs, standards and requirements. All the services mentioned were performed timely and in a professional manner. We recommend Kavoseismic as an experienced Seismic Contractor and look forward to working with Kavoseismic again.

On behalf of San Leon & NovaSeis

Managing Director
Pawel Chalupka
